MEMORANDUM TO: Samuel J. Collins, Director
Office of Nuclear Reactor Regulation

Ashok C. Thadani, Director
Office of Nuclear Regulatory Research

FROM: William D. Travers */RA/*
Executive Director for Operations

SUBJECT: DIFFERING PROFESSIONAL OPINION ON
STEAM GENERATOR TUBE INTEGRITY

By memorandum dated February 1, 2001, Dr. Dana Powers, Chairman of the Advisory Committee for Reactor Safeguards (ACRS) Ad Hoc Subcommittee on a Differing Professional Opinion provided to me a draft copy of its summary report on matters pertaining to a differing professional opinion on steam generator tube integrity. In its draft report, "Voltage-Based Alternative Repair Criteria," the Ad Hoc Subcommittee discussed its conclusions and recommendations. This draft report was issued in final form as NUREG-1740 dated February 2001.

The Office of Nuclear Reactor Regulation (NRR) and the Office of Nuclear Regulatory Research (RES) should review the ACRS Ad Hoc Subcommittee report and develop a joint action plan to address the conclusions and recommendations. NRR and RES should coordinate the responsibility for the development of the action plan tasks and schedules, as necessary. The joint action plan should identify for each of these tasks (1) which organization has lead responsibility, (2) the tasks which will be initiated (or the existing staff activities which address the conclusions or recommendations), and (3) the time frame anticipated to complete each task. The scope of work for each task should be described sufficient to establish how the concerns identified in the ACRS Ad Hoc Subcommittee report will be addressed. Recognizing that many of the ACRS's recommendations represent new work for both NRR and RES, resources needed to address the issues should be identified and prioritized in accordance with established procedures and consistent with agency goals.

The action plan should be developed and provided to me within two months from the date of issuance of this memorandum.
